

Anwendungen, die von Blue Coat PacketShaper klassifiziert und kontrolliert werden

Blue Coat PacketShaper liefert ein genaues Bild des Netzwerkdatenverkehrs, indem mehr als 600 gängige Anwendungen automatisch erkannt und transparent gemacht werden. Tausende weitere Anwendungen können zusätzlich definiert werden. Mit dem Anwendungswissen von Layer-7 Plus sowie herkömmlichen Layer-2-4-Informationen wird der Datenverkehr überwacht und anhand verschiedener Merkmale klassifiziert, z. B. Anwendungssignatur, URL, HTTP-Inhaltstyp, Oracle-Server, Citrix Published Application, IP-Adresse, VLAN, MAC, MPLS-Tag, DiffServ, TOS und andere. Dank dieser Anwendungstransparenz können Unternehmen Netzwerkprobleme schneller identifizieren und diagnostizieren und die erforderliche Servicequalität (QoS) für geschäftskritische Anwendungen an allen Standorten sicherstellen.

Liste der Anwendungen

Client-Server	MSSQL	MS-Exchange-Dir	Spiele	NNTP-Clear	IPCV
FIX	MSSQL-Mon S	MS-Exchange-MAPI	Asheron sCall	NNTP-Secure	IPLT
FoldingAtHome	MSSQL-Server	MS-Exchange-Admin	Battle.net	SOAP-HTTP S	IPPC
INFOC-RTMS	Oracle	MSSQ x	Battlefield	TCP	IPX-in-IP
INT-1	Oracle-netv1	MSSQ-CQ	City Of Heroes	TFTP	IPX
MATIP	Oracle-netv2 x	MSSQ-IS	Doom	UDP	IPv6
MATIP-A	Oracle-JVM-SSL	MSSQ-Ping	Everquest	UUCP	IRTP
MATIP-B	Oracle-SSL	MSSQ-QMT	GameSpy	WAP	ISIS
NetIQ	OracleClient	MSSQ-SQ	Half-Life	XTP	ISO-TP4
OpenConnect-JCP	OracleEM	OSI	Half-Life-TCP	LAN-Altssysteme und Nicht-IP	Kryptolan
